Eric & Chip,
Great job on a real big & difficult task! Matt gave you Rod's comments on the Data Gap memo in our 11/30 mtg. In that mtg, we discussed most of the concerns Matt & I has. I've added just a few minor comments to the attached document. Let's get it out.

You need to label & title Table 8.

Rod had a couple of edits on Table 5 that we did get to you earlier. They include:

- 1) All AOPC need to consider in-water & historic sources of contamination. The message being sent is that all in-water contamination is from upland sources via transport. RD2 data suggest significant in-water contamination from over-water activities.
- 2) Typo ("not" rather than "rnot") in OF 47 "Source Area" cell.
- 3) "Overwater activities" should be included the "Source Area" cells for the following AOPC: Gunderson/Shell; Shipyard/Lagoon; Triangle Park; RPAC/Arkema;
- 4) "Source Area" cell for Willamette Cove should be changed to "Yes"
- 5) TZW cell for Willamette Cove should be changed to "Yes (release area/product removal area)".
- 6) A note should be added to OF 48 saying "high-level controlled since late-1998".

Subject: Round 3 Data Gaps Memo

Attached is the draft Round 3 Data Gaps Memo. Tables and figures will be sent in separate emails. We are planning to go over this document at the November 30th meeting. We will finalize the document Thursday and send to LWG with an accompanying memo/cover letter. This document should still be considered draft. I have still not reviewed the document as a complete package and additional input from tomorrow's food web model meeting as well as input from Ben Cope will likely result in changes and additions. I will send out an agenda for the November 30th meeting tomorrow.

Thanks again to everyone helped pull this together. I look forward to discussing it on Wednesday.

Eric
